

### Our vision

Leading the way to excellent oral healthcare for everyone

### Our mission

To shape policy, improve practice and support our members by bringing together dentistry, surgery, medicine and Public Health to deliver excellent oral healthcare in the UK and around the world

### Our values

Collaboration

Respect

Excellence

### How we work

- We collaborate with regional, national and international learner and expert networks
- We organise the knowledge and insights of these networks to create curricula and standards
- We consult stakeholders, patient and carer groups for their views and advice on clinical and educational standards
- We assess, accredit and maintain the competence of our fellows and members
- We foster innovation through education and research
- We advocate for the adoption of policies and practices across the world

# Faculty of Dental Surgery

## Our strategy 2022–2025

### Our priorities

1

#### To set the highest possible standards

in oral healthcare by driving research, collating expertise and understanding the needs of our patients

2

#### To develop the skills

and confidence, networks and knowledge of our fellows and members at all stages of their careers

3

#### To inform and influence policy makers

by advocating for better and more equitable oral healthcare

4

#### To transform our Faculty

by sharing the values and aligning our strengths with The Royal College of Surgeons of England

5

#### To grow our membership

by embracing diversity, fostering belonging, nurturing future leaders and inspiring the next generation of dental professionals
