

Help us protect front line workers from COVID-19 and keep health services functioning

WE ASK YOUR HELP

We are asking our community to respond to the Surgical MedTech “PPE Challenge”. Post your Personal Protection Equipment (PPE) challenge or solution to NIHR Surgical MIC.

WE NEED TO KNOW

We need to know what the real day-to-day challenges are for front line healthcare workers in maintaining PPE, or simple, effective solutions that might be rapidly scaled up. Examples might include impractical “doffing and donning techniques”, communication difficulties when wearing PPE, modified snorkel face masks, etc.

IMMEDIATE IMPACT

There will be immediate impact, as challenges and solutions will be collated and presented to our community of researchers, industry partners, and funders.

PLEASE SUBMIT

Please submit your “PPE Challenge” using the QR code below or via this link: <https://form.jotform.com/200841607553048>. This can be a simple text message or a photograph of the challenge/solution.
