

Job description

Job title:	Clinical Fellow for National Non-Hodgkin Lymphoma Audit
Grade:	Pay scales for junior doctors in England up to ST5 (£40,257 to £51,017, plus London weighting) in a full-time position or from ST6 to ST8 (£58,298 pro rata plus London weighting) in a part-time position, depending on qualifications and experience.
Department:	National Cancer Audit Collaborating Centre (NATCAN) based in the Clinical Effectiveness Unit (CEU)
Responsible for:	n/a
Accountable to:	Audit's Lead Methodologist and ultimately the Director of Clinical Effectiveness Unit (CEU)

Job summary

The fellowship provides a unique opportunity to work at a new national centre of excellence to help strengthen NHS cancer services and reduce variation in care. The role is based at the National Cancer Audit Collaborating Centre (NATCAN) within the Clinical Effectiveness Unit (CEU), jointly run by the Royal College of Surgeons of England (RCSEng) and the London School of Hygiene & Tropical Medicine (LSHTM).

The position would be suitable for a clinical trainee with an interest in haematology. The successful candidate will work within a multidisciplinary team, delivering a new national audit in Non-Hodgkin Lymphoma and carrying out research whilst developing advanced analysis and research skills.

Having large detailed linked datasets available to you to carry out research provides the potential to generate a large number of academic papers. The post-holder is expected to lead on the writing of journal articles and conference presentations and work towards either an MD or PhD with the support of senior colleagues in NATCAN. The fees for an MD or PhD will be covered by the CEU.

A current Clinical Fellow says *"This clinical fellowship provides a fantastic opportunity to work first hand with national cancer data, and learn a wide range of research skills and techniques in order to undertake clinical research with 'big data'. The role is extremely well-supported from academics and clinicians at the forefront of their fields, and has provided me with invaluable opportunities to present at national and international conferences, be involved with national audit processes and outcomes, and establish academic links. I cannot recommend this position highly enough."*

Collaboration

Respect

Excellence

David Cutter and Cathy Burton, Audit Clinical Co-leads say *“This clinical fellowship represents a rare chance for a specialist haematology trainee with an interest in research to work on non-laboratory based studies with the potential to make immediate clinical impacts, both nationally and internationally. The national datasets used for these audits are a unique resource with immense potential and working with them alongside an established team of experienced data scientists, project managers and clinicians will allow the post-holder to author a number of presentation and publications and develop a wide range of research skills that will prove invaluable to their future career.”*

Further details about the National Non-Hodgkin Lymphoma Audit, National Cancer Audit Collaborating Centre and the Clinical Effectiveness Unit are available at the bottom of the job description.

Specific duties and responsibilities

1. **Development of the National Non-Hodgkin Lymphoma Audit**

- To work closely with the Audit senior methodologists and clinical leads (Dr Cathy Burton, Consultant Haematologist and Dr David Cutter, Consultant Clinical Oncologist) as well as NATCAN team members based in the CEU in developing the Audit. This work will include:
- Describing patterns of care and patient outcomes by analysing national datasets on hospital care, surgery, chemotherapy and radiotherapy from the Audit's data providers in England (National Cancer Registration and Analysis Service [NCRAS], NHS England) and Wales (Wales Cancer Network, NHS Wales Health Collaborative)
- Reporting on the variation in the treatment and outcomes of patients with Non-Hodgkin Lymphoma in web-based quarterly reports, State of the Nation Reports, conference presentations and papers for peer-reviewed publications
- Supporting the dissemination of the Audit findings to key (professional and patient) stakeholders

2. **Collaboration with NCRAS, NHS England and Wales Cancer Network, NHS Wales Health Collaborative and other relevant organisations to improve quality and timeliness of data, and increase the engagement of staff within NHS hospitals**

- To liaise with NCRAS, NHS England and Wales Cancer Network, NHS Wales Health Collaborative in order to support the project management and data collection
- To liaise with staff in participating NHS hospitals in order to publicise the Audit and its findings and to respond to clinical queries
- To liaise with all professional bodies involved in the management of patients with Non-Hodgkin Lymphoma, and to represent the Audit at regional and national meetings

3. **Quality improvement and communication**

- To contribute to developing and implementing plans for the Audit healthcare improvement activities including: improvement events, workshops and webinars
- To promote engagement with trainee networks and professional bodies
- To produce audit communications (newsletters, emails, social media, website)
- To contribute to the Audit's communication strategy, and identify opportunities to improve quality of communications with commissioners and other stakeholders
- To support and facilitate communication with, and meetings of, the Audit Patient Panel.

Collaboration

Respect

Excellence

4. Other

- To undergo further training in statistics and audit / research methodology
- To maintain the confidentiality of data at all times and to ensure that the requirements of the General Data Protection Regulation (GDPR) are met throughout the project
- To ensure that the data collection, analysis and reporting of the study is carried out to the highest professional standards
- To carry out other occasional duties within NATCAN and the Clinical Effectiveness Unit, e.g. contributing to training workshops

There will be no clinical duties or on-call commitments but there is flexibility to allow the post-holder to maintain some clinical practice.

We encourage trainees to reach out to NHLaudit@rcseng.ac.uk or Associate Professor Kate Walker, Audit Lead Methodologist (Kate.Walker@lshtm.ac.uk), for further information or to arrange a discussion with one of the Audit Clinical Co-Leads.

This job description will be subject to review in the light of changing circumstances and may include other duties and responsibilities as may be determined. It is not intended to be rigid or inflexible but should be regarded as providing guidelines within which the individual works.

National Non-Hodgkin Lymphoma Audit

The National Non-Hodgkin Lymphoma Audit will evaluate the quality of care received by patients newly diagnosed with Non-Hodgkin Lymphoma in NHS hospitals in England and Wales. Its aim is to assess the organisation of cancer services as well as the diagnosis and staging process and the outcomes of treatment.

The successful candidate will be part of a multidisciplinary team working in partnership with senior members of the British Society for Haematology, the UK Lymphoma Radiotherapy Group and the National Cancer Research Institute Lymphoma Group. They will support the delivery of the audit and will play a central role in producing the audit reports and other outputs.

National Cancer Audit Collaborating Centre

Evaluating and where necessary improving the treatment for cancer patients is a key priority for the NHS Cancer Programme, and the Quality Statement for Cancer Wales. The Healthcare Quality Improvement Partnership, on behalf of NHS England and the Welsh Government, has commissioned the development and establishment of a new centre of excellence for national cancer audits.

NATCAN is part of the National Clinical Audit and Patient Outcomes Programme (NCAPOP). NATCAN will deliver six new national cancer audits in breast cancer (primary and metastatic), ovarian, pancreatic, non-Hodgkin lymphoma and kidney cancer. It aims to:

1. Provide regular and timely evidence to cancer services of where patterns of care in England and Wales vary.
2. Support NHS services to identify the reasons for the variation in care in order to guide quality improvement initiatives.
3. Stimulate improvements in cancer detection, treatment and outcomes including survival.

[NATCAN](#) began on the 1 October 2022 in the CEU at the RCSEng. The CEU is a collaboration between the RCSEng and the LSHTM and currently delivers clinical audits in [prostate](#), [lung](#), [gastro-oesophageal](#) and [bowel](#) cancer, and recently completed an audit of [breast cancer in older patients](#).

NATCAN will collaborate closely with professional groups, clinicians and patient charities to ensure that all relevant stakeholders inform the quality improvement goals of each audit. NATCAN will have approximately 20 staff from a range of disciplines including statistics, data science, health services research, epidemiology, healthcare quality improvement and clinical audit management. It is led by Dr Julie Nossiter, Director of Operations, NATCAN; Prof David Cromwell, Director of the CEU and Professor of Health Services Research, LSHTM; Dr Kate Walker, Associate Professor of Medical Statistics, LSHTM; and Prof Jan van der Meulen, Professor of Clinical Epidemiology, LSHTM.

NATCAN will be a key source of information that supports various quality assessment and improvement activities, both at a local level (by NHS trusts and boards, Cancer Alliances,

Collaboration

Integrated care Systems) and at a national level (e.g., CQC inspection and regulatory work). The activities of NATCAN and the individual audits will drive quality improvement across the country aiming to help cancer services reach the highest standards possible.

Clinical Effectiveness Unit

The [CEU](#) is a collaboration between the RCSEng and the Department of Health Services Research & Policy of the LSHTM.

The work of the CEU involves carrying out national clinical audits, developing audit methodologies and producing evidence on clinical and cost effectiveness. The CEU currently delivers cancer audits in prostate, lung, bowel, oesophageal and stomach cancer, and recently completed an audit of breast cancer in older patients. These audits have helped to identify and address variations in cancer care across England and Wales, and improve outcomes for patients. They have also promoted quality improvement initiatives within NHS cancer services and identified best practice.

An essential element of the CEU's strategy is that it considers audit projects as *epidemiological studies* of the quality of hospital care. Epidemiological methods are used to generate high quality evidence on the *processes* and *outcomes* of hospital care as well as on their *determinants*. Another important feature of the CEU's strategy is the emphasis it gives to joint clinical and methodological leadership.

The CEU has 20 staff members, of whom 6 are academic staff members of the LSHTM. The background of the staff demonstrates the multidisciplinary character of the Unit (medicine, health services research, medical statistics, epidemiology and public health). The Unit's Director is Professor David Cromwell.
