Questionnaire for women who have had mastectomy surgery

--	--	--	--	--	--	--	--	--	--

What is this survey about?

We are writing to you on behalf of the National Mastectomy and Breast Reconstruction Audit. This audit is being carried out by the Royal College of Surgeons of England and the NHS Information Centre. It aims to improve the care provided to those women diagnosed with breast cancer or DCIS (ductal carcinoma in situ).

While in hospital about eighteen months ago, you kindly agreed to receive a questionnaire to assess the results of your surgery.

We would like to find out about your experiences and quality of life after surgery.

Some women undergo breast reconstruction at the time of their mastectomy, although many do not. According to our records you did not have a reconstruction, and therefore this questionnaire only relates to your experiences after mastectomy.

Your answers will help us to improve the care provided to all women who have this type of surgery, and we would very much appreciate your help in achieving this goal.

Who should complete the questionnaire?

The questions should be answered by the person named on the front of the envelope

Completing the questionnaire

Please answer each question using a black or blue pen. Don't worry if you make a mistake – simply cross out the mistake and mark the correct answer. Please do not write your name or address anywhere on the questionnaire. Please return the questionnaire in the enclosed addressed envelope. You do not have to use a stamp as the postage is already paid.

Questions or help?

If you have any questions, please call the helpline on 0207 869 6619.

Taking part in this survey is voluntary. Your answers will be treated in confidence, and will not be seen by the doctors and nurses involved in your care. We will follow the standards set out in the Data Protection Act (1998) throughout our work.
